

DS-A1

REMOTE INTERACTIVE (RI) DOCK FOR THE iPod

ONKYO
IMAGINATIVE SIGHT & SOUND

Doing More with Your iPod—Through Onkyo's Imaginative Sight and Sound

Simply place your iPod in the DS-A1 Remote Interactive Dock connected to any Onkyo RI-compatible receiver/amplifier to experience the powerfully rich sound of Onkyo audio-video components. Control your music from your RI remote and charge your iPod while you enjoy your iPod's digital music—and photos—through Onkyo's expansive sound, from mini systems to separate components to home theater systems. Unlike purely iPod-dedicated systems, you can fully integrate the convenience and storage capacity of your iPod with all your other Onkyo home entertainment components—and share the experience with everyone.

Onkyo's Exclusive Remote Interactive (RI) Technology Offers Remote Control of iPod

Over the last 10 years, Onkyo's RI system has enabled users to operate, via a single remote, all parts of a system set up with some or all of the following components: receivers, amplifiers, Universal/DVD/CD players, disk changers, MD decks, cassette decks and tuners. Onkyo owners have been able to enjoy the same level of smooth operation as they would experience with an integrated audio-video system. The DS-A1 is connected via the Tape, MD, CD-R or HDD input (whichever is free) on your receiver/amplifier, and an RI connection is made directly between the DS-A1 and the receiver/amplifier's RI input. You may then use the remote for the iPod's common functions like Play, Pause, Next Song and Previous Song.

Share Your Digital Photos through iPod Photo

By connecting the DS-A1 to your TV via the S-Video output on the RI dock's rear, you can share your digital photos (stored in an iPod photo) with others. You can playback the iPod photo's contents as a slideshow (frame-by-frame playback is not possible) over the larger display of your TV—an entirely enjoyable experience compared to viewing your photos over the limitations of a computer display. While you relive your images, you also have the option of music (through your Onkyo system) to accompany your slideshow.

Charge Your iPod Battery While You Enjoy Your Music

The DS-A1 has an AC adapter on the rear that needs to be plugged in when you playback your music. When your iPod is in the RI Dock, which is plugged into a wall socket, your iPod's battery will charge, regardless of whether the DS-A1's power indicator is on or off. While you're enjoying the iPod's music in the comfort of your own home, you're also fully charging your iPod for when you're on the move.

A Range of Functions Designed to Integrate the iPod with Onkyo Components*

Through the RI function, you can control basic iPod functions such as Play, Pause, Next Song and Previous Song. Depending on your receiver/amplifier and the version of iPod, the DS-A1 makes it easier to operate your iPod and integrate it into your system. With the System On/System Off function, the powering on/off of your receiver/amplifier will also power on/off the DS-A1 and iPod. Similarly, with the Auto Power On function, by pressing your remote controller's play function while your receiver/amplifier is in Standby mode, the receiver/amplifier will automatically turn on and select your iPod as the input source. The Auto Selector (Direct Change) function will automatically select your iPod as the input source if you start iPod playback while listening to another input source. And with the iPod's Timer function, you can power on and start playback at a specified time.

Increased Versatility and Enhanced Functionality with Latest iPod Generations

The DS-A1 is compatible with the following: 3rd Generation iPod with touch wheel and buttons (software 2.2 or later); 4th Generation iPod with Click Wheel (software version 3.0.2 or later); iPod mini (software 1.2 or later); or iPod photo (software 1.0 or later). 4th Generation iPods and iPod minis bring a lot more than the basic functions (depending on your receiver/amplifier):* Shuffle for Songs and Albums, Repeat modes, Backlight duration, and Playlist/Album modes. If you upgrade your iPod or your Onkyo components, it is possible to get greater remote capability.

* Available functions will vary depending on which iPod model and which Onkyo components are used.

RI

Features

- Connects with Onkyo RI-compatible receivers/amplifiers and audio-video systems
- Charges iPod through AC adapter
- Brings audiophile quality to digital music files
- Enables iPod photo slide shows
- Brings remote control to the iPod
- Auto selector function
- Time play/Sleep timer function
- Alarm function

Package Contents

- DS-A1 Remote Interactive Dock
- AC adapter
- Audio, S-Video and RI cables
- iPod adapters
- Instruction manual

SPECIFICATIONS

Power supply	AC adapter (12 V DC)
Power consumption	0.4 W (iPod not inserted)
Connectors	S VIDEO OUT jack, AUDIO OUT L/R jacks, RI jack, DC IN 12 V 1 A jack
Dimensions (W x H x D)	112 x 56 x 112 mm
Weight	0.2 kg

Connecting and Setting Up the DS-A1

On the bottom of the unit, set RI MODE SELECT to match the input terminal to which the DS-A1 has been connected (TAPE, MD, CD-R or HDD).
